SUMMARY

Skilled technical leader with 9 years of experience in the software industry, specializing in technical communication and online help systems. Proficient in front-end tools and Git workflows, with a strong focus on creating user-friendly documentation. Quick to learn new products, ensuring thorough and comprehensive documentation. Highly inquisitive, always ready to explore and master software for effective documentation.

PROFESSIONAL EXPERIENCE

MANAGER, DOCUMENTATION

Nov 2022–Present

Nautical Commerce, Toronto

- Enable developers and end-users to optimize our product through detailed API-references, tutorials, videos, release notes, and technical support.
- Empower internal teams and solution integration partners with interactive product training.
- Facilitate customer engagement with personalized product onboarding, including live training sessions and webinars.
- Develop and maintain a comprehensive documentation website utilizing Docusaurus, ensuring continuous access to up-to-date resources.

MANAGER, PRODUCT OPERATIONS

Mar 2022–Nov 2022

Veeva Systems, Toronto

- Led all release & end-user documentation for a team of four in a highly-regulated industry.
- Facilitated monthly release preview webinars.
- Managed the product team's project milestones & deliverables throughout software development lifecycle.
- Facilitated release planning & design collaboration cycles between product management and engineering
- Managed an online help system serving 2,000 monthly users and delivered weekly customer release notifications.

TECHNICAL WRITER LEAD

Apr 2020–Mar 2022

Veeva Systems, Toronto

- Expanded the technical writing team and managed all release publishing activities.
- Regularly produce content to support how to enable and use new features being released on a monthly-basis.
- Onboarded and trained technical writers on software and authoring tools.
- Implemented a GitLab CI/CD pipeline for automated online help updates.
- Developed processes and style guides to support the growing team.
